RedCLARA

Cooperación Latino Americana de Redes Avanzadas

the latinamerican network of academic networks

Our strength is cooperation

we are the latinamerican space for cooperation and development of the cyberinfrastructure for education, science and innovation

Since 2004 RedCLARA provides regional and global connectivity through its links to the global network architecture (GÉANT, Internet2, Ubuntunet, Wacren, Aspen, Apan, Tein, Aarnet)

OUR MEMBERS

Thirteen National Research and Education Networks providing services to more than 2049 universities and research centers

Increasing cooperation opportunities in science, education and innovation

We congregate the biggest academic community in Latinamerica

RedCLARA connects Latinamerica with the globe

With the bandwidth and quality required to support science and research

RedCLARA has the vision of integrating all Latinamerican countries, to increase opportunities for all to foster development
