Commercial and Services

Who is RedCLARA ?

About RedCLARA

It interconnects the National Research and Education Networks (NREN) of Argentina, Brazil, Colombia, Costa Rica, Chile, Ecuador, Guatemala, Mexico, Uruguay and connects them to advanced academic networks in the rest of the world to benefit the development of science and the academy, generating capacities for intraregional and transcontinental research in all areas of knowledge, promoting the development of applications that eliminate borders.

More country's are working in the development of a NREN and will be joining forces with RedCLARA in the near future (Panamá , Peru and El Salvador).

BELLA II Project

BELLA II is a regional initiative that aims to reduce the digital divide and support the development of the necessary infrastructure to consolidate and expand a digital ecosystem of science, technology, education, and innovation. It seeks to strengthen and expand the digital ecosystem of Latin America and the Caribbean, enabling relations and exchanges between companies, research centers, educational institutions and national research and education networks, which are aligned with the strategic objectives in education, science, technology and innovation from LAC.

BELLA II
